

General use progressive lens
with **generous visual areas** for near and distance

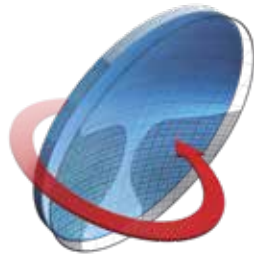

Ideal as a daily **all-purpose** progressive lens

Ideal solution for **wearers with demanding requirements for large visual fields at any distance**. These patients are characterized by asking for a comfortable lens while at the same time wanting excellent vision of objects located at any distance.

PRESCRIBING SIMPLICITY SAVES TIME

The Surface Power technology incorporated in this lens brings together the latest optical developments and the simplicity of prescribing found with traditional progressive lenses. Manufactured with advanced technology, this lens **doesn't require any special parameter measurements** because it is similar to a traditional progressive. All of this is possible thanks to an innovative way of producing lenses with the progressive surface cut on the back, rather than the front side.

EVERYDAY B DESIGN OVERVIEW

Everyday B is produced with the latest digital-surfacing technology that assures **clear vision and good quality**. The compromise between visual field has been effectively balanced so it provides wearers with **stable and generous areas for both distance and near vision**. Everyday B has large, balanced visual areas, and its advantageous power transition allows the eye to move more naturally through the corridor.

MINIMUM FITTING HEIGHTS AVAILABLE

Everyday B is available in 3 minimum fitting heights:

MFH 14	Minimum Fitting Height 14 mm
MFH 16	Minimum Fitting Height 16 mm
MFH 18	Minimum Fitting Height 18 mm

Digital lens

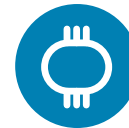

Balanced design

Multiple corridor

Short corridor available

Variable Inset
